

Abhishek Pratap Solanki

Full Stack Web Developer

PROFESSIONAL SUMMARY

Experienced Full Stack Web Developer with over 2 years of proficiency in the MERN stack. Skilled in JavaScript, HTML, CSS, React, and Next.js, with additional expertise in React Native. Successfully tackled 400+ Data Structure and Algorithm challenges, showcasing exceptional problem-solving abilities. Demonstrated capability in designing scalable APIs and optimizing database queries. Detail-oriented and collaborative, committed to delivering high-quality code and continuous improvement.

PROJECTS

1. Beauty Hub | |

React | Redux | Node.js | Git | Express.js | MongoDB |

RESTful APIs | Responsive Web Design | JWT | ChakraUI

- Collaborated with a team of 5 to build frontend components using React and Redux, ensuring a responsive user interface.
- Implemented efficient server-side APIs with Node.js and Express.js, facilitating seamless operations for product management.
- Designed and optimized MongoDB models and queries to support end-to-end flow and enhance database performance.
- Integrated JWT for secure login and signup functionality, ensuring user data protection and privacy.

2. LYST - Clone | |

React | RESTful APIs | CSS3 | Responsive Web Design |

Chakra UI | JSON Server

- Developed user authentication and profile management using React and RESTful APIs.
- Implemented gender-specific product searches and wishlist feature enhancing user engagement.
- Designed and built responsive UI components using CSS3 and Chakra UI for an optimal user experience.
- Integrated cart functionality with address input and simulated payment processing for a complete shopping workflow.
- Ensured seamless interaction between frontend components and JSON Server backend.

WORK EXPERIENCE

DigitEd Labs Private limited

Full Stack Developer - Hyderabad

May 2023 - May 2024

Job responsibilities:

- Implemented dynamic and responsive web pages using React JS, Next JS, HTML5, CSS3, JavaScript, TypeScript, and Material UI.
- Designed and developed the user interface for Android and iOS applications using React Native and Native Base.
- Integrated Apollo Server for GraphQL queries to improve data fetching capabilities.
